Gary,
VB607 had 25% solids therefore NH Solidification is the way to go with that box. VB610 only had 2% solids but it did have 7% TOC therefore base disposal was .45/gal for D018 waters and .20/gal surcharge for TOC. I can ask Demita if they ran their analysis on the entire sample or just the water. I'll let you know.

Thanks,

Beth Crawford

Beth

Leroy indicated that Lonestar came back with .65/gallon. They got a complete sample of the wastestream but we were only planning on sending them the water phase. Did they base their price on the entire sample contents or the water phase? We were going to suck off the water phase and send the remainder to Waste Connections for solidification.

Could you ask Demita?

Thanks

Gary Moore
